

Maintenance And Service Contract

Manufacturers recommend a yearly cleaning on your equipment to keep their warranty in effect. We offer a maintenance plan that will provide you with a maintenance cleaning and inspection for your equipment. With the cleaning and inspection of your furnace our NATE and EPA certified technicians will come out to your home and clean and check the burners and flame sensor. They will check the heat exchanger for visual cracks as well as do a carbon monoxide check. They will check the pilot assembly and gas pressure. They will check the igniter and other working components to make sure they are working properly. On you central air they will check and clean the condenser, and the drain pan. They will check the fan and motor for the proper amp draws and to make sure the connections are proper. They will do their best to make sure your unit is working per the manufacture specifications. With this plan we also will clean and inspect your water heater, humidifier, air cleaners as well as any other heating and cooling components you may have. We will replace your filters and humidifier pads but those will be charged accordingly since there are so many different ones out there. We hope to hear from you in the future for service or sales.

Thank you for taking the time to review this.

With the purchase of the plan you will become a preferred customer and will receive the following benefits:

- 10% savings on appliance and HVAC repairs needed during your covered period
- All parts are warranted for 1 year and labor is warranted for 90
- No trip charges will be charged to you on your HVAC equipment
- No overtime rates
- You will receive priority service within 5 hours of placing your call
- The plan is transferred to the new homeowner if you sell your home.

To purchase the plan you can fill out the form to the right and mail to:

Mich-Tech One, Corp.
10124 Willis Rd
Willis, Mi. 48191
